How Crypto Trading Works

Crypto prices go **up and down** based on demand and supply.

 If you buy at a low price and sell at a higher price → **Profit**

 If you buy at a high price and price falls → **Loss**

What is Forex Trading?

In forex, currencies are traded in pairs, such as:

- Euro / US Dollar (EUR/USD)
- British Pound / US Dollar (GBP/USD)
- US Dollar / Japanese Yen (USD/JPY)

You predict whether one currency will go **up**  or **down**  compared to the other.
